

Mohammad, Computer Science Student

13350 Jakarta, Indonesia, +6287775594302, mohishaaqq@gmail.com

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience in Machine Learning, Computer Vision, and AI-powered product development. Developed projects including inventory forecasting systems, deepfake detection, crowd analysis, and accessibility-focused computer vision applications. As Founder & CTO of Wessky and Kopi Rute, led product strategy, digital experience development, and technology initiatives, combining technical expertise with business and product thinking. Passionate about building intelligent systems that solve real-world problems through data, AI, and user-centered design.

WORK EXPERIENCE

Jun 2023 — Feb 2026	Founder & CTO, Kopi Rute Jakarta, Indonesia - Co-founded and led the technology strategy of a coffee business focused on storytelling, customer experience, and data-driven operations. - Designed and developed interactive web experiences that integrated brand storytelling with customer engagement. - Planned and prototyped an operational management platform covering inventory tracking, workflow management, and business operations. - Designed a Point-of-Sale (POS) system capable of collecting operational and transaction data for business intelligence purposes. - Integrated AI-driven analytics concepts to transform operational data into actionable insights for sales, inventory, and customer behavior analysis. - Directed digital product development, technology architecture, and innovation initiatives across customer-facing and internal systems.
Jul 2025 — Aug 2025	Machine Learning Developer, Academic Capstone Project Jakarta, Indonesia - Developed a machine learning system to forecast restaurant inventory demand and optimize stock planning. - Built forecasting models to support inventory management and supplier planning. - Performed data preprocessing, feature engineering, and predictive analytics. - Developed interactive dashboards for inventory monitoring and business decision-making. - Utilized Python, Pandas, NumPy, and Streamlit for model development and visualization.
Oct 2025 — Dec 2025	Computer Vision Developer, Personal AI Project Jakarta, Indonesia - Developed an object detection system using YOLO for accessibility-related object recognition. - Built models capable of detecting wheelchairs, canes, and elderly individuals from images. - Performed dataset preparation, training, evaluation, and inference testing. - Applied computer vision techniques to support accessibility-aware environments. - Improved detection accuracy through model tuning and experimentation.
Jan 2026 — Feb 2026	Computer Vision Developer, Personal AI Project Jakarta, Indonesia - Developed a crowd counting and density estimation system using computer vision techniques. - Built image inference pipelines and density visualization tools. - Processed and analyzed crowd datasets for model training and evaluation. - Applied PyTorch and image processing libraries to develop prediction models. - Evaluated model performance using benchmark datasets and accuracy metrics.
Mar 2026 — Present	Computer Vision Developer, Personal AI Project Jakarta, Indonesia - Developed a deepfake detection system using deep learning and computer vision techniques. - Built image and video classification pipelines for authenticity verification. - Trained and evaluated deep learning models using PyTorch. - Implemented inference workflows and prediction visualization interfaces. - Improved model performance through experimentation and evaluation.
Mar 2026 — Present	Founder & CTO, Wessky.co - Founded and developed a storytelling-driven streetwear brand centered on growth, identity, and self-expression. - Led brand strategy, product development, and digital experience planning.

- Directed collection concepts, visual identity systems, and customer-facing brand experiences.
- Translated brand narratives into website concepts, digital interactions, and marketing initiatives.
- Conducted market research and consumer analysis to refine positioning within the streetwear market.

EDUCATION

Jun 2018 - Jun 2021	High School, SMA Muhammadiyah 4	Jakarta, Indonesia
Aug 2022 - Present	Bachelor of Computer Science, Bina Nusantara University • Computer Science student with a focus on Artificial Intelligence, Machine Learning, and Computer Vision. • Developed academic and personal projects in predictive analytics, deep learning, and computer vision. • Built AI-powered systems including inventory forecasting, deepfake detection, crowd analysis, and accessibility-focused detection models. • Interested in AI product development, data-driven systems, and technology entrepreneurship.	Jakarta, Indonesia

SKILLS

Machine Learning	Advanced	Product Development	Advanced
Product Strategy	Advanced	Communication	Advanced
python	Intermediate	Computer Vision	Intermediate
Leadership	Intermediate	Problem Solving	Intermediate
Data Analysis	Intermediate	PyTorch	Intermediate
JavaScript	Intermediate	UI/UX Design	Intermediate
Git & GitHub	Intermediate	Streamlit	Intermediate
System Design	Intermediate		

COURSES

Oct 2024 - Present	Supervised Machine Learning: Regression and Classification , DeepLearning.AI • Stanford University
Nov 2024 - Present	Unsupervised Learning, Recommenders, Reinforcement Learning , DeepLearning.AI • Stanford University
Feb 2025 - Present	Advanced Learning Algorithms , DeepLearning.AI • Stanford University
Feb 2025 - Present	Machine Learning Spesialisasi , DeepLearning.AI • Stanford University

LANGUAGES

Indonesia	Native	English	B2 - Upper intermediate
